(54) METHOD AND SYSTEM FOR ACCELERATING POP-UP LINK INSIDE HYPER TEXT USABLE COMPUTER SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To display new information to a user viewing a web page by using a pop-up window.

SOLUTION: A pop-up link is indicated by pop-up extension to an HTML language. When a browser usable for processing the pop-up link detects an HTML tag provided with a pop-up attribute, the browser executes below-mentioned steps. (1) A file called 'bar.html' is taken out from a server called 'foo.com', (2) the bar.html file is indicated on a display device and (3) one or plural data relating to the pop-up link referred to inside the taken-out file such as a second file and an incorporated object referred to by the second file are taken out. At the time of receiving the activation of the pop-up link, the taken-out data are displayed inside the pop-up window on the display device.
